

Getting Started with AI: Tools, Skills, and Pathways for Newbies

Artificial Intelligence (AI) is now part of our daily lives ; in school, work, and beyond. This workshop is for students, new graduates, and anyone curious to learn what AI is, which tools to use, and how to start building skills step by step.

Workshop Level

Basic /Intermediate.

This is an open and free session for anyone interested in learning. All are welcome!

Trainer

Adebowale Aduloju

<https://www.linkedin.com/in/adebowaleaduloju/>

Outline:

- What AI is today (and what it cannot do yet)
- Useful AI tools for students and beginners (ChatGPT, Claude, Canva AI, etc.)
- How to build AI knowledge and skills
- Jobs and career opportunities with AI
- A simple 90-day action plan to get started

Objectives

By the end of this session, you will:

- Understand what AI can and cannot do
- Know which tools to use for studying and work
- See different ways to learn AI (technical and non-technical)
- Learn how AI is used in different industries
- Have a clear plan for the first 90 days of learning AI

Who Should Join

- Students who want to use AI in their studies
- Fresh graduates starting their careers
- Young professionals who want to add AI to their skills

- Anyone who wants to start learning AI but does not know where to begin
